Emergency Medicine: “From Current Advances to Building the Future”

Syrian Emergency Medicine Initiative (SEMI)

The Syrian Emergency Medicine Initiative (SEMI) is a global network of Syrian Emergency Medicine professionals from within Syria and abroad working together to strengthen Emergency Medicine in Syria through education, training, collaboration, and knowledge exchange.

SEMI's key projects and achievements include:

- **EM Resident Virtual Teaching Programme** – supporting structured education and professional development for Emergency Medicine residents.
- **24-hour Residents & Faculty WhatsApp Group** – providing continuous access to clinical advice, discussion, and support for medical queries.
- **Pre-hospital Care Development** – supporting the development of pre-hospital emergency care services in Syria.
- **Poison Centre Rebuilding Project** – contributing to the development of specialised toxicology and poison centre services in Syria.
- **EM 2025 Conference, Damascus** – organizing the first SEMI Emergency Medicine Conference in Damascus, bringing together Emergency Medicine professionals from Syria and abroad to share knowledge, experience, and best practice.

Conference Objectives

The conference aims to bring together Emergency Medicine professionals from Syria and around the world to share knowledge, experience, and best practice. Beyond addressing the needs of today, we aim to **look towards the future of Emergency Medicine in Syria** — developing the next generation of emergency physicians, strengthening education and training, fostering innovation and collaboration, and working together towards a modern, sustainable, and high-quality emergency care system.
